MEMORANDUM FOR: Contracting Officer

**SUBJECT: Intelligence Value of Radar Photography:
Modified AN/APQ-56**

1. At the briefing in HTAUTOMAT over a month ago, when the capabilities of the APQ-56 were explained and its product displayed, the participating agencies were requested to submit their views if any with regard to this instrument in terms of intelligence value.

2. For your information and such assistance as they may be, there are attached two memoranda, one from the Army (TCS-918-57) and one from the Navy (TCS-1032-57).

3. I do not think I can add any useful comment to these papers since they are self-explanatory except with regard to paragraph 6 of the Navy paper which refers to the use of the APQ-56 on carrier-based naval photographic units. It seems to me that this point is covered or would be covered through the liaison which now exists between Navy research and development and yourself.
